## AARP Selects Genesis Security To Provide Full Service Support For Their Integrated Security System

AARP, the largest association in the Washington metropolitan area occupying more than 550,000 square feet of office space, has selected Genesis Security Systems LLC of Germantown Maryland to provide service and expansion support for their electronic access control and CCTV security system located in downtown Washington DC. As part of this project, Genesis will be bringing their current Software House system up to the latest software version and implement a series of upgrades to their CCTV system.

According to Alan Kruglak of Genesis Security Systems, "AARP decided to make the change to Genesis for two reasons. First, through press releases and talking with other facility managers, they had heard about our reputation for high-quality customer-first service. Although clients can always purchase hardware from any source, it is the post-sales service which makes or breaks the relationship. Second, AARP appreciated our fast response to their questions and inquiries. In today's world, you can't wait months or weeks for a response. Clients need the answers to their questions now. And that is what we've been providing to AARP as well as to our other clients."

As Larry Lupo at AARP stated, "We look forward to a long-term partnership relationship with Genesis."
