## Howard Hughes Medical Institute Upgrades CCTV System From Analog To Digital With Genesis

The Howard Hughes Medical Institute (HHMI) has selected Genesis Security Systems LLC of Germantown Maryland to upgrade their existing CCTV security system from analog to a digital system at their main campus located in Maryland.

Howard Hughes  
Medical Institute

The CCTV system upgrade involves multiple phases, including the upgrade of all cameras from monochrome to high-resolution color; the replacement of an older matrix switching system to the latest technology; and the replacement of video multiplexers and VHS tape recorders with digital video recorders.

According to Stephen Parks at HHMI, they decided to upgrade their system “to keep pace with current technology and also enable their security personnel to easily access stored video information. Prior to the upgrade retrieving recorded video information was difficult at best. With digital video recorders, it’s easy to access recorded information from anywhere on our internal network.”

“We selected Genesis Security Systems because they’ve taken the time to understand our needs, and provide specific solutions to meet them. Plus, when we call for service, they respond right away.”

For more information about Genesis Security Systems and our capabilities and services, please contact Alan Kruglak at 301-515-4400 or [akruglak@gensecsystems.com](mailto:akruglak@gensecsystems.com).
